it's the solution  
you've been  
looking for..**

# An introduction to Stashd

A brief introduction to the Stashd service and what it is.

Imagine a world where your customers could use their face as their ticket for the hottest concerts, speed through your airport and board flights without their passports or even skip the queues to collect car rental and go directly to their hotel room without needing to check-in first.

Sounds great right? Well here at Stashd we're making this possible..

Our revolutionary new digital information service is transforming the way in which organisations and individuals exchange information with one another. Stashd is a digital information service designed to replace physical documents, such as tickets, passports, membership cards and more with digital representations.

These are securely stored in the cloud and easily retrieved using a variety of fast and efficient mechanisms, for example facial recognition.

Our revolutionary new service eliminates lost, damaged or stolen documents and enables digital verification reducing queues and improving the customer experience. Organisations can eliminate fraud, reduce manual document verification and improve the efficiency of their operations. Stashd is set to change the way that individuals and organisations exchange information with each other.

What, how and why

---

# security by design

## Seamless Integration

Our powerful widget provides fast and seamless integration regardless of our clients choice of device or platform. Meaning you can add the Stashd plug in to nearly any of your existing kiosks, apps or websites. Our widget is built with security at it's very foundations so you can use it with peace of mind.

## Government Grade Security

We believe the facts should speak for themselves so we've coupled Microsofts Tier 4 datacentres with military level encryption to create the foundations of our service. This powerful combination allows our customers and clients to relax and know that the security and integrity of our service has been taken care of.

## Privacy by Design

As you would expect our entire service is developed and operated following the Privacy by Design principles and compliant with the General Data Protection Regulations. At iPassport and Stashd we strive to make sure we have the customer at the heart of what we do, and that starts with respecting privacy and making sure we meet expectations.

# save time

## **What we do**

The Stashd service aims to eliminate the need for the physical documents usually required for organisations to verify their consumers.

We've developed a secure service for our users to create digital versions of their personal documents and identities including passports, tickets, membership cards and boarding passes. Stashd is designed to be a global service, hosting numerous kinds of documents issued by multiple organisations in a multitude of countries.

One last thing

---

# save workforce

## How we can do it

Users grant trust to organisations to issue and retrieve documents stored in their Stashd account. Instead of having to then present physical documents to an organisation, Stashd provides digital solutions, such as facial recognition, for this information to be retrieved and automatically verified.

The identification and verification process is lightning fast and reduces the chance of human error, allowing the individuals to pass through a security barrier, open a door or carry on their journey with ease.

# save the planet

## **Why we do it**

Whilst we try to eliminate the inconvenience of forgetting or losing documents, Stashd is also great for the planet. We're aiming to reduce the amount of printed documents that we're all used to carrying around with us meaning less plastic, paper and card being used.

Our revolutionary service provides a host of solutions that fit seamlessly into any operation to identify and verify individuals. It allows organisations to cut down on staff costs, combat fraud and give your consumers a much better experience.

## Company Address.

iPassport Ltd. Suite 8, Metropolitan House  
38 - 40 High Street, Croydon, CR0 1YBP
